

Your homeowners insurance doesn't cover floods...

Federal flood insurance does.

Floods can happen anytime, anywhere. They cause anguish and destruction—physical, emotional, and financial.

Especially when victims realize the damage isn't covered by their homeowners insurance policy.

Federal disaster assistance?

It's not the answer either.

Why? Because in most cases, the only aid disaster victims may qualify for is a loan, and that must be repaid—with interest!

Only Federal flood insurance reimburses you for flood damage to your property!

With one annual premium, you can protect your most important investment—your home and your finances.

Call your insurance agent or company today.

Ask about the National Flood Insurance Program. There's no better way to save for a rainy day.
